

HARDCORE PARKOUR!!!

In this game, you are running from a cube of death that begins to spin at the halfway checkpoint. On your journey to the checkpoint, you have to jump over a speeding VW Beetle otherwise you will be pushed by the car into the cube and to your death. To earn points, tap the "f" key then the "j" key over and over again, but do not hold down either of them or you will lose points. If you successfully make it to the halfway checkpoint, you will gain quadruple points from there until the finish. However, if you push "f", "j", or "spacebar" twice in a row or hold any key down, you will lose points and the cube of death will jump forward each time in an effort to eat you. In order to be considered "eaten" the center point of you has to touch the center point of the cube because that makes it more interesting.

How to play:

Alternate between "f" and "j" to move

note: you can still move with "f" and "j" while in the air

Press space to jump
